

## K3GP Antenna Trimming

20 Meter Yagi at bottom of tram line ready to go up.

Sling support & Unistrut trailing tiller (R7 Vert behind)

View to top of tower showing tram line

View showing top guy lines that antenna must clear

Starting to pull antenna up tram line

The tractor is the anchor point for the tram line

Lift begins, Unistrut tiller keeps antenna from swiveling

This view shows pull rope under tram line

Antenna nearing the top - note how it clears top guys

Standing directly beneath antenna - about 30 more feet to go

Lawn tractor pulls lift rope thru snatch block at tower base

Another view shows antenna clearing top guys

Antenna reaches top of tower, tilts a bit.
